# TSNZ6 MORE ABOUT TESTSHEEPNZ …

Va avea urmatorul continut:

Mike first became interested in IT [when he received his first ZX Spectrum in 1982](). Originally programming games, he became more and more interested in using computers to solve problems, starting with his maths homework.

This interest led him from modelling Brownian and simple harmonic motion at school, to modelling cometary orbits and signal processing both radio signals from the Sun and opto-electronic sensors before leading to work for military applications in sonar, radar and aircraft avionics.

If this makes him sound like an overachiever, fear not - his Achilles heel is trying to play the guitar and read music, for which - after many years of trying in a soundproof basement - he shows absolutely zero aptitude.
